EARTH SCIENCE 1.STUDENTS' WORKSHEETS

Reading about landscapes:

1. One of my favorite landscapes is in La Gomera. It is a forested landscape called Garajonay and it is a National Park. It has got many different types of evergreen trees and also a narrow stream. In the middle of the forest there is a small chapel. The air is always fresh and the smell is nice. I like this landscape because it makes me feel peaceful and good. Forested landscapes are generally fascinating.
2. Fuerteventura has got beautiful mountainous landscapes. In Jandía there is a high mountain range. It has got many wide valleys and narrow ravines. There are some plants and you can also see goats and donkeys. I love the mountains of Fuerteventura because they make me feel small and isolated. Mountainous landscapes are amazing.
3. One of my favorite landscapes is in Lanzarote. It is an agricultural landscape called la Geria. It is also a volcanic landscape with black volcanic fields and black lava plains. There are many vineyards cultivated and the people from the island make wine out of the grapes. I love this landscape because it makes me feel calm. It is like a moon landscape. Volcanic landscapes are incredible.

Now you write about your favorite landscape, choosing one of the models and changing the underlined words to say what you want.
